

Summary of 14th Technical Conference

1. Date: February 3, 2017 (Fri.) 10:30 ~ 12:10
2. Place: Board Room, Otemachi Headquarters, Central Research Institute of Electric Power Industry

3. Participants:

Chair: Yokoo (NRRC)

Members: Maki (Hokkaido EPCO), Obonai (Tohoku EPCO, substitute for Kato), Igarashi, Kawamura (Tokyo EPCO), Masuda, Nakagawa, Nagura (Chubu EPCO), Takahashi (Hokuriku EPCO), Suzuki, Oishi, Urata (Kansai EPCO, substitute for Yoshihara), Iwasaki (Chugoku EPCO), Kawanishi (Shikoku EPCO), Ishizaka (JAPC), Kodama (JNFL, substitute for Okamura), Kuramoto (J-Power), Kawamura (Toshiba, substitute for Noda), Marusue (Hitachi-GE, substitute for Konno), Takahashi (MHI, substitute for Kono), Kurata (JANSI), Takahashi, Shimeno, Zama, Sakai, Ueda, Yamamoto (NRRC)

Observer: Omoto (NRRC)

4. Proceedings:

(1) Research Topics

NRRC reported on the fire PRA in the US, tsunami PRA method development project and the research project of fault displacement analysis.

(Remarks from members)

<Tsunami PRA Project>

- ◆ The proposed plan for the tsunami PRA project is well developed so that we can get a concrete picture of it. Since many technological elements should be integrated into this project, it would be better to identify the timing when individual elements will be developed enough to be applied.

(2) Operating Status of NRRC

NRRC reported on the expert review of the pilot projects.

(Remarks from members)

- ◆ The expert review is a very meaningful endeavor. We hope to obtain knowledge of the international state-of-practice of PRA through this review.
