4. Proceedings:

(1) R&D results of FY2017

NRRC reported on research results of FY2017.

(Remarks from members ◆Industry members, ◇CRIEPI members)

- ◆It is important that each research contributes to PRA and overall plan works well. We would like to have a way to see the whole picture and share a common understanding.
- ◇NRRC agrees with your opinion and actually tried to illustrate such perspective in the NRRC R&D roadmap. We will develop it further while elaborating on details of each research plan.
- ◆As to the volcano research, NRRC should promote collaborations with other organizations such as universities so that many professors and experts take part in the discussion.

(2) Status of NRRC Activities

NRRC reported on the following topics.

- The 3rd Ikata PRA external review
- PRA staff training courses sponsored by NRRC
- Preliminary plan of NRRC workshop on risk management
